# Information Technologies for Industrial Engineers

เทคโนโลยีสารสนเทศสำหรับวิศวกรอุตสาหการ

#### **HTML**

- HyperText Markup Language
- Standard markup language for documents designed to be displayed in a web browser.
- Can be assisted by technologies such as Cascading Style Sheets (CSS) and scripting languages such as JavaScript.

#### **HTML element**

- Encloses parts of the content to make it appear a certain way.
- Consists of
  - Opening tag
  - Closing tag
  - Content

## **Attribute**

 Contain extra information about the element.

```
Attribute
class="editor-note">My cat is very grumpy
```

## **Empty element**

```
<img src="images/firefox-icon.png" alt="My test image" />
```

- Two attributes
- No content
- Does not require / at the end.
- However, in React JS, this is required. Therefore you should write

```
<img src="images/firefox-icon.png" alt="My test image" />
```

#### **HTML document**

#### <!DOCTYPE html>

A required preamble (คำนำ).

## <html></html>

- Wraps all the content on the entire page
- Root element

#### <head></head>

 Container for all the stuff to include on the HTML page that isn't the content you are showing to your page's viewers.

#### <meta charset="utf-8">

- Set the character set of the document to UTF-8.
  - Includes most characters from the vast majority of written languages.
- No reason not to set this.

## <title></title>

- Sets the title of the page
  - Browser tab the page
  - Bookmark/favorite

## <body></body>

- Contains all the content shown to web users
  - Text, images, videos, games, playable audio tracks, ...

## **Deloyment**
